

We are looking for an

AUTOMATION ENGINEER

About the role

As our ambitious customers continue to raise the bar and challenge us in exciting ways, we're expanding our capacity to meet their expectations.

As Automation Engineer in Technicon, you will:

- + Be a part of TECHNICON's strong software team
- + Be developing high-tech automation solutions for several leading pharma companies.
- + Be responsible for developing and programming automation solutions that ensure quality and stability in our projects.
- + Have big influence on how to execute the versatile, exiting, and demanding tasks
- + Be involved in all facets and will participate in all project phases: from order to design, programming, testing, commissioning, and completion
- + Work closely with our customers with tasks within project start-up and troubleshooting of software solutions

We expect:

- + Experience with PLC or robot programming
- + A relevant background as Automation or Software engineer or similar
- + You take pleasure in solving our customers' requests, and you follow the task all the way to the end
- + Fluent in written and spoken English
- + Strong analytical skills and a structured approach to your work

What do we offer

Being yourself and having space for your personal life matters. That's why our work culture is built on trust and flexibility. Whether you're an early starter or work best later in the day, we focus on what works for you and the team.

We work in teams assembled based on the specific project, so you'll collaborate with many skilled and diverse colleagues.

In short:

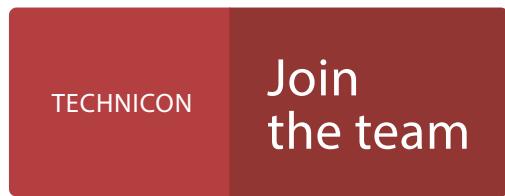

- ✚ A great work environment with humor in everyday life
- ✚ Good and flexible working conditions
- ✚ A focus on you and your personal preferences
- ✚ Opportunities for further education and training
- ✚ Close collaboration and sparring with experienced colleague

We offer you an exciting and forward-thinking workplace with a positive atmosphere, where there's plenty of room to be yourself.

Who are we

At TECHNICON, we are driven by the ambition to create intuitive and user-friendly automation solutions for the pharmaceutical industry. We believe that the best solutions come from the synergy between people and technology, and from the collaboration of skilled and committed colleagues.

You'll become part of a passionate, interdisciplinary team where you can grow both personally and professionally.

How to apply

You can apply by sending a traditional application and CV – but if you prefer a video application, that's very welcome too. We're conducting interviews on an ongoing basis, so don't wait too long to get in touch.

Apply here: application@technicon.dk. Remember to write the name of the job in the subject field.

If you have any questions about the position, feel free to contact Lars Dahl Vester at +45 2916 1012 or ldv@technicon.dk

We're looking forward to hearing from you!
