

We are looking for a

## MECHANICAL ENGINEER INTERN

### About the Internship

As an intern, you will work with mechanical design within concept development, design, and manufacturing of robotic systems and special-purpose machines.

### What can you expect as an intern at Technicon:

- + A great work environment with humor in everyday life
- + Training and involvement in Technicon's workflows
- + Good and flexible working conditions
- + Participation in Technicon's many social events such as LAN parties, running, padel, and Friday bars
- + Option for a lunch scheme

As an intern at Technicon, you will gain unique insight into a project-oriented workflow – you will experience taking the theory you know from your studies and see how it interacts with real timelines, risk assessments, budgets, and the interdisciplinary collaboration needed to implement mechanical solutions together with colleagues from other teams – and much more.

You will primarily work on a project together with colleagues from the mechanical design team under a project manager who sets the framework for the work. Here, you will have the opportunity to influence the tasks you prefer – whether you want to dive into new or familiar tasks, independent or group-oriented, large or small. No matter what, you will never be left alone, and you should never hesitate to ask questions if you are in doubt along the way.

## What do we offer you

As an intern here, you will also gain insight into the practical aspects of mechanical design through Technicon's in-house production. You will receive real feedback on your technical drawings and advice on how to improve them – you will experience the process from brainstorming and idea generation to CAD modeling, technical drawings, and finally a physical part you can hold in your hands.

Many colleagues and fellow interns live in Aarhus and Aalborg, so a car-sharing arrangement is definitely realistic.

---

*At Technicon, interns are welcomed exceptionally well. You get to work as part of a real team and almost feel like a full-time employee – you're not just standing on the sidelines. There is a strong focus on well-being, which you'll experience through many leisure activities. Plus, it's incredibly cool to be able to tell others about the areas you're working in!*

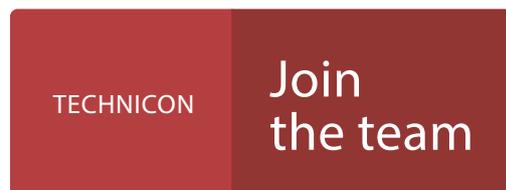

*Former intern, Asbjørn*

## Who we are

At Technicon, we are driven by the ambition to create intuitive and user-friendly automation solutions for the pharma industry. We believe the best results come from the interaction between humans and robots – and, most importantly, from collaboration among dedicated colleagues. We are a team of curious, passionate specialists who value teamwork, knowledge sharing, and collective success.

Here, your ideas have room to grow, your skills are taken seriously, and you become part of a strong interdisciplinary community where professionalism and humanity go hand in hand. We don't just create unique solutions for our customers – we create a workday filled with job satisfaction, personal development, and professional pride.

## How to apply

You can apply by sending a traditional application and CV – but if you prefer a video application, that's very welcome too. Please send your application and CV to: [application@technicon.dk](mailto:application@technicon.dk)

We're conducting interviews on an ongoing basis, so don't wait too long to get in touch. If you have any questions about the position, feel free to contact our HR department at +45 29161012 or email [ldv@technicon.dk](mailto:ldv@technicon.dk)

We look forward to hearing from you!
